

Project Development Phase Model Performance Test

Date	10 February 2025
Team ID	SWUID2026297489
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	10 Marks

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Values	Screenshot																																																		
1.	Metrics	Regression Model: MAE - Not applicable, MSE - Not applicable, RMSE - Not applicable, R2 score - Not applicable (the flow predicts categories, not numeric values). Classification Model: Confusion Matrix - see screenshot (2 test tickets: Network / Wi-Fi and Hardware / Projector classified correctly, 0 misclassified). Accuracy Score - 100% (2 of 2). Classification Report - <table><thead><tr><th>Class (Category / Subcategory)</th><th>Precision</th><th>Recall</th><th>F1-score</th><th>Support</th></tr></thead><tbody><tr><td>Network / Wi-Fi</td><td>1.00</td><td>1.00</td><td>1.00</td><td>1</td></tr><tr><td>Hardware / Projector</td><td>1.00</td><td>1.00</td><td>1.00</td><td>1</td></tr><tr><td>Access / Forgot Password</td><td>-</td><td>-</td><td>-</td><td>0</td></tr><tr><td>Performance / Slow Computer</td><td>-</td><td>-</td><td>-</td><td>0</td></tr><tr><td>Accuracy</td><td></td><td></td><td>1.00</td><td>2</td></tr></tbody></table> Access and Performance have no test samples yet (support 0), so their scores are not calculated.	Class (Category / Subcategory)	Precision	Recall	F1-score	Support	Network / Wi-Fi	1.00	1.00	1.00	1	Hardware / Projector	1.00	1.00	1.00	1	Access / Forgot Password	-	-	-	0	Performance / Slow Computer	-	-	-	0	Accuracy			1.00	2	Confusion Matrix (2 test tickets) <table><tr><td>Network</td><td>1</td><td>0</td><td>0</td><td>0</td></tr><tr><td>Hardware</td><td>0</td><td>1</td><td>0</td><td>0</td></tr><tr><td>Access</td><td>0</td><td>0</td><td>0</td><td>0</td></tr><tr><td>Performance</td><td>0</td><td>0</td><td>0</td><td>0</td></tr></table> Actual (expected) Network Hardware Access Performance Predicted (flow output) Confusion matrix from the executed test tickets	Network	1	0	0	0	Hardware	0	1	0	0	Access	0	0	0	0	Performance	0	0	0	0
Class (Category / Subcategory)	Precision	Recall	F1-score	Support																																																	
Network / Wi-Fi	1.00	1.00	1.00	1																																																	
Hardware / Projector	1.00	1.00	1.00	1																																																	
Access / Forgot Password	-	-	-	0																																																	
Performance / Slow Computer	-	-	-	0																																																	
Accuracy			1.00	2																																																	
Network	1	0	0	0																																																	
Hardware	0	1	0	0																																																	
Access	0	0	0	0																																																	
Performance	0	0	0	0																																																	
2.	Tune the Model	Hyperparameter Tuning - Not applicable. The flow uses fixed keyword rules, so there are no hyperparameters to tune. It can be improved by adding more keywords (for example WiFi, Login, Hanging) and a default branch for unmatched tickets. Validation Method - Manual functional validation. Create a ticket with only Caller and Short description, save and reload the form, then compare the auto-filled Category and Subcategory with the expected values. Confirm the confirmation email under System Logs, Emails.	Validation: INC00511 filled as Network / Wi-Fi Validation: INC00512 filled as Hardware / Projector
