

Functional & Performance Testing Template

Model Performance Test

Date	21 February 2025
Team ID	SWUID2026297489
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	

Test Scenarios & Results

Test Case ID	Scenario (What to test)	Test Steps (How to test)	Expected Result	Actual Result	Pass/Fail
FT-01	Text Input Validation (Caller, Short description)	Open a new Incident WorkFlow record. Enter a valid Caller and Short description. Also try leaving them empty.	Valid inputs accepted. Mandatory fields cannot be left empty.	Valid inputs accepted and ticket saved (INC00511, INC00512). Caller and Short description are marked mandatory (*) on the form.	Pass
FT-02	Dependent Choice Validation (Category and Subcategory)	Select each Category and open the Subcategory list.	Only the matching Subcategory is shown for the selected Category.	Network shows Wi-Fi; Hardware shows Projector; Access shows Forgot Password; Performance shows Slow Computer.	Pass
FT-03	Auto Classification (Flow Designer)	Enter Caller and Short description only, save, and reload the form.	Category and Subcategory are filled automatically based on the keyword.	INC00511 ("Network" issue) filled as Network / Wi-Fi. INC00512 ("Projector not turning on") filled as Hardware / Projector.	Pass
FT-04	Email Notification Check	Open System Logs, Emails, search the subject, and use Preview Email.	Confirmation email is created for the caller's email address.	Email "Your Request for the issue has been submitted." found for the caller's email; Preview Email shows the confirmation message.	Pass
PT-01	Response Time Test	Save a new ticket and use a timer (or Flow Designer Executions) to check how long classification takes.	Should be under 3 seconds.	To be recorded.	Pending
PT-02	Multiple Tickets Test	Create several tickets one after another (or at the same time from different users).	Flow should not slow down; every ticket is classified.	To be recorded.	Pending
PT-03	Bulk Record Load Test	Load many records (for example 20 to 50 tickets using an Import Set or list import) and check the flow.	Should work smoothly without errors or crashing.	To be recorded.	Pending
