Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	

Project Overview:

Project Name: Auto Ticket Classification using Flow Designer

Project Description: A ServiceNow solution for a school IT helpdesk that automatically assigns Category and Subcategory to new tickets by checking keywords in the short description, and emails the caller an acknowledgement. It uses a custom table (Incident Workflow), dependent choice fields and a Flow Designer flow.

Project Version: 1.0

Testing Period: 06 February 2026 to 06 February 2026 (dates taken from the test records and email log)

Testing Scope:

Features and functionalities tested:

- Custom table with auto-numbered tickets (INC prefix)
- Dependent Category and Subcategory choices
- Auto-classification by Flow Designer (trigger: Category is empty)
- Email notification to the caller
- Update set completion and XML export

Requirements tested:

- Classify tickets automatically from the issue description (no manual selection)
- Support dependent choice logic between Category and Subcategory
- Send an automated email to the caller when a ticket is created
- Store ticket data in a structured, standard format

Testing Environment:

URL/Location: ServiceNow instance - Incident Workflow table (u_incident_workflow), Global scope [add your instance URL]

Credentials (if required): Administrator account of the instance (not shared in this document)

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Network keyword classifies as Network / Wi-Fi	1. Open Incident Workflow, New 2. Enter Caller and Short description "My college has issue with Network" 3. Submit and reload the record	Category = Network, Subcategory = Wi-Fi	INC00511 saved with Category = Network and Subcategory = Wi-Fi	Pass
TC-002	Projector keyword classifies as Hardware / Projector	1. Open Incident Workflow, New 2. Enter Caller and Short description "Projector not turning on" 3. Submit and reload the record	Category = Hardware, Subcategory = Projector	INC00512 saved with Category = Hardware and Subcategory = Projector	Pass

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-003	Email sent to caller on ticket creation	1. All menus, System Logs, Emails 2. Search subject "Your Request for the issue has been submitted" 3. Open record, Preview Email	Email addressed to the caller's email with the confirmation message	Two emails logged (send-ready, SMTP) to the callers' addresses; preview shows the message	Pass
TC-004	Subcategory choices depend on Category	1. Open a new record 2. Select each Category in turn 3. Open the Subcategory list	Network: Wi-Fi; Hardware: Projector; Access: Forgot Password; Performance: Slow Computer	Each Category showed only its matching Subcategory	Pass
TC-005	Auto-number generated correctly	1. Create two records 2. Check the Number field	Unique sequential numbers with INC prefix	INC00511 and INC00512, no duplicates	Pass
TC-006	Update set completed and exported	1. Open Project Update Set 2. Set State to Complete and save 3. Related Links, Export to XML	XML file downloaded	sys_remote_update_set_...xml (182 KB) downloaded	Pass
TC-007	Password keyword classifies as Access / Forgot Password	1. New record 2. Short description "Forgot password" 3. Submit and reload	Category = Access, Subcategory = Forgot Password	Not yet executed	Pending
TC-008	Slow computer keyword classifies as Performance / Slow Computer	1. New record 2. Short description "Slow computer" 3. Submit and reload	Category = Performance, Subcategory = Slow Computer	Not yet executed	Pending
TC-009	Description with no keyword	1. New record 2. Short description "Printer is not working" 3. Submit and reload	Ticket flagged for manual review (see BG-003)	Not yet executed	Pending

Bug Tracking:

These were found by reviewing the flow configuration and the email preview. Items marked (review) have not been reproduced with a test record yet.

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	Keywords "Login", "Hanging" and "Slow" alone are not classified; the flow only checks "Forgot password" and "Slow computer" (review)	1. New record 2. Short description "Cannot login" 3. Submit	Medium	Open	Add OR conditions for Password, Login, Slow and Hanging
BG-002	"WiFi" without the hyphen does not match the "Wi-Fi" condition (review)	1. New record 2. Short description "WiFi not working" 3. Submit	Medium	Open	Add a "WiFi" condition to the first branch
BG-003	Tickets with no matching keyword stay uncategorised; there is no default Else branch (review)	1. New record 2. Short description with no keyword 3. Submit	Medium	Open	Add an Else branch that sets a default or triage group
BG-004	Email text has grammar errors and does not include the ticket number	1. Create a ticket 2. Emails log, Preview Email	Low	Open	Reword the body and add the Number data pill

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-005	Mixed descriptions (e.g. "Projector Wi-Fi not working") take the first matching branch only (review)	1. New record 2. Short description "Projector Wi-Fi not working" 3. Submit	Low	Open	Known limit of keyword matching
